

Rehan Reza

Computer Science Undergrad | Aspiring Software Engineer

rehanreza204@gmail.com | +91 93391 99499 | [linkedin.com/in/rehan-reza-36549a369](https://www.linkedin.com/in/rehan-reza-36549a369)

PROFILE

Pre-final year CSE student passionate about building scalable web applications and exploring machine learning algorithms. Proficient in Python, Java, and Data Structures. Always eager to solve real-world problems through clean, efficient code and collaborative engineering. Open to internship and project opportunities.

EDUCATION

B.Tech in Computer Science & Engineering
[Brainware University](#)

Expected Graduation: 2027

EXPERIENCE

Web Developer — IBM

2 Months

- Built and refined front-end features using HTML, CSS, and React alongside the engineering team.
- Practiced collaborative development workflows, including version control with Git.
- Gained first-hand exposure to how production web applications are structured and maintained.

PROJECTS

To-Do List

A responsive task-management web application that allows users to create, manage, and organize their daily tasks. Built with HTML, CSS, React, Python, and SQL.

SKILLS

Python · HTML · CSS · React · SQL · Git · Data Structures & Algorithms

CAREER GOAL

To become a skilled Software Engineer and work on real-world projects, scalable applications, and AI/ML technologies.
